

This architectural elevation drawing shows a row of five townhouses. The first two townhouses on the left are dark red with steep gabled roofs. Each has a central entrance door and two windows on the ground floor, and two windows on the upper floor. The middle two townhouses are brown with lower, hipped roofs. Each has a central entrance door and two windows on the ground floor, and two windows on the upper floor. The fifth townhouse on the right is reddish-brown with a steep gabled roof, a central entrance door, and two windows on the ground floor, and two windows on the upper floor. The drawing uses simple lines and flat colors to represent the building's facade.
